

Mechanical Project Engineer

We are a growing original equipment manufacturer, (OEM), that designs and builds automated assembly and test equipment. We are based in the Erie, Pennsylvania area. We offer our employees the opportunity to be an integral part of a team that creates unique and innovative solutions in the challenging and fast paced field of assembly automation. A small company doing big things where everyone has a key role.

The Company: Great Lake Automation Services, Inc. (GLASI) was founded in 2002 and its automation division has since become a \$7M a year business propelled by its ability to engineer and build quality equipment and satisfy the needs of both its customers and its employees.

- Our clients have included manufacturers in the fields of automotive, medical, consumer goods and others and to date we have installed over 900 pieces of equipment globally.
- At GLASI we believe in providing to our customers the most cost effective and robust solutions to their manufacturing challenges and always meeting or exceeding their expectations.
- We offer excellent health plans, paid personal and vacation time, and a 401K program which includes company contributions.

Requirements:

- Mechanical Engineering Degree or equivalent experience.
- Eight years or more experience as a designer or supervisor of designers of custom machines, (specifically machines related to automated assembly, inspection, and/or robotic integration).
- Experience with Solidworks or similar 3D design software.
- Good communication and team skills.

Responsibilities:

- Lead an engineering team to engineer/design high quality, reliable assembly equipment.
- Assure that equipment is designed to GLASI standards and any technical customer specifications.
- Guide the engineering team in such a way to meet the design requirements within specified budgets and schedules.
- Communicate effectively and work with the engineering team, project managers, machine builders and customers.

The Location: GLASI is based in McKean, Pennsylvania... less than 10 miles south of Erie, a vibrant city boasting a relatively low cost of living and a long list of interesting and exciting things to do and see. Erie is just a short drive away from Cleveland, Pittsburgh, Buffalo and Niagara Falls. Check out Erie at www.eriepa.com

Why Should You Apply?

- GLASI is a growing company in a fast-paced exciting field which offers top benefits located in a great place to live.
